- A. AI, Tech & the Future.
- B. Rishi Sunak and Elon Musk
- C. Prime Minister Rishi Sunak and Elon Musk recently had a fascinating discussion about AI, technology, and the future of human civilization². They touched on the potential of AI to create a utopian future, where AI could eliminate the need for human work and provide meaningful companionship. However, they also acknowledged the current negative impacts and controversies surrounding AI technologies².
Sunak emphasized the importance of government oversight in AI development, stating that AI firms cannot be left to "mark their own homework". He highlighted the UK's efforts to implement safety testing for powerful AI models and the need for global cooperation to manage AI risks³.
- D. "AI is a powerful tool, but it must be used responsibly."
